SUMMARY

Senior ML Engineer with 5+ years of experience building production AI systems in FinTech. Expert in PyTorch, LLM fine-tuning, and MLOps on AWS. Led fraud detection systems processing 10M+ transactions/day.

EXPERIENCE

Senior ML Engineer — PayTech Solutions (2020–Present, 4 years)

- Built end-to-end credit risk model (XGBoost + neural net ensemble) reducing default prediction error by 23%
- Fine-tuned LLaMA-2 for financial document summarisation using LoRA; deployed via SageMaker endpoints
- Implemented RAG pipeline with LangChain + FAISS for compliance Q&A; chatbot
- Designed MLflow-based experiment tracking and model versioning across 6-engineer team
- Deployed models on Kubernetes (EKS); built CI/CD with GitHub Actions + Docker

ML Engineer — DataCore Analytics (2018–2020, 2 years)

- Developed fraud detection classifier (F1=0.94) using Gradient Boosting on PostgreSQL data
- Built feature engineering pipeline (Python, pandas, scikit-learn) for real-time inference

EDUCATION

M.Tech — Computer Science (AI specialisation) — IIT Delhi — 2018 (CGPA: 8.9/10)

B.Tech — Computer Science — NIT Trichy — 2016

SKILLS

Python · PyTorch · TensorFlow · LangChain · LlamaIndex · LLM fine-tuning · RAG · MLflow · Docker
· Kubernetes · AWS SageMaker · GCP Vertex AI · PostgreSQL · MongoDB · FastAPI · Git

CERTIFICATIONS

AWS Certified Machine Learning – Specialty (2022)

GCP Professional Data Engineer (2023)

PROJECTS / PUBLICATIONS

- "Adaptive RAG for Financial Compliance" — arXiv preprint, 2023
- Open-source: langchain-fintools (820 GitHub stars)
- Credit Scoring Explainability Dashboard — Streamlit + SHAP
