

# PRIYA NAIR

priya.nair@techmail.com | +91-8765432109 | github.com/priyanair

## PROFESSIONAL SUMMARY

ML Engineer with 4.5 years in applied deep learning and MLOps. Delivered production credit scoring and anomaly detection systems for two leading fintech firms. Published researcher in NLP.

## WORK EXPERIENCE

ML Engineer — CreditAI Pvt. Ltd (2021–Present, 3.5 years)

- Designed transformer-based credit risk scoring model (AUROC 0.96) deployed on GCP Vertex AI
- Built LangGraph multi-agent pipeline for loan document verification, cutting review time 40%
- Implemented MLOps stack: MLflow + DVC + Docker + Kubernetes on GCP GKE
- Maintained PostgreSQL + MongoDB data warehouse feeding real-time model inference

Junior Data Scientist — Analytics House (2019–2021, 2 years)

- Built fraud detection models using Isolation Forest and LSTM; Python, scikit-learn, TensorFlow
- Automated data pipelines with Apache Airflow + AWS S3

## EDUCATION

B.Tech — Computer Science — BITS Pilani — 2019 (CGPA: 9.1/10)

## CERTIFICATIONS

GCP Professional Data Engineer

Deep Learning Specialisation — Coursera (Andrew Ng)

## SKILLS

Python · PyTorch · TensorFlow · LangGraph · LangChain · MLflow · DVC · Docker · Kubernetes · GCP Vertex AI · AWS SageMaker · PostgreSQL · MongoDB · SQL · Airflow

## PUBLICATIONS

"Multi-modal Fraud Detection using Graph Neural Networks" — AAAI Workshop 2023

## PROJECTS

- Real-time fraud scoring API (FastAPI + Redis + Kafka)
- LLM-powered loan document classifier (LangChain + GPT-4)
- Explainable AI dashboard for credit decisions (SHAP + Streamlit)
