ABOUT ME

Software engineer with 3 years of experience in Python development and some exposure to data science and ML. Looking to transition fully into ML engineering.

EXPERIENCE

Backend Software Engineer — TechStartup India (2021–Present, 3 years)

- Built REST APIs with Python (FastAPI, Flask) and PostgreSQL
- Wrote automated tests; CI/CD pipelines with GitHub Actions and Docker
- Some exposure to pandas and scikit-learn for internal analytics dashboards

Intern — DataWorks (2020, 6 months)

- Data cleaning and EDA using pandas and matplotlib
- Built a logistic regression model for customer churn (accuracy 78%)

EDUCATION

B.Tech — Information Technology — VIT Vellore — 2021 (CGPA: 7.8/10)

SKILLS

Python · FastAPI · Flask · PostgreSQL · Docker · Git · GitHub Actions · pandas · scikit-learn · NumPy · JavaScript · React

PROJECTS

- E-commerce recommendation engine (collaborative filtering, scikit-learn)
- Sentiment analysis on Twitter data (NLTK, basic classifier)
- Personal finance tracker app (FastAPI + React)

CERTIFICATIONS

None

NOTES

Currently self-studying PyTorch through fast.ai course. Interested in LLMs and RAG.
